Professional Summary

Performance-focused Senior Frontend Developer with over 5 years of experience (2019–Present) engineering high-availability web and mobile ecosystems.

Development Philosophy: The Modular Architecture I architect maintainable systems by treating components like "LEGO blocks"—reusable, composable, and predictable. By leveraging atomic functions and composable logic, I prioritize rapid delivery cycles without the accumulation of technical debt.

I bridge the gap between frontend simplicity and backend complexity through full-stack awareness. My exploration of Golang allows me to optimize API contracts and state management from a server-side perspective, while my research into Svelte provides a critical lens to rethink and streamline React-based complexity. I am committed to mentorship and architectural leadership, consistently driving teams toward performance-first development.

Core Skills & Technical Proficiencies

- **Frontend Ecosystem:** React | React Native | Next.js | Svelte | TypeScript | Nuxt 3
- **Performance & Optimization:** SSG/ISR | Data Validation | Lighthouse Optimization | Unit Testing
- **Backend Awareness & Security:** Go (Golang) | OWASP Standards (CSP, Secure Headers)
- **Process & Leadership:** Agile/Fast Iteration | Code Review & Mentorship | End-to-End App Store Deployment

Professional Experience

Prodigi (via PT Loren Tech Solutions) | Jakarta, Indonesia **Senior Frontend Developer** | *April 2024 – March 2026*

- **Built** and maintained several web portals including a customer portal, agency quotation platform, and internal/external CMS dashboards using Next.js and React.
- **Implemented** SSG/ISR architecture to improve page load times and help reduce server costs.

- **Improved** Lighthouse scores from 65 to 95 and developed optimized validation logic for complex, excel-like data entry systems.
- **Applied** OWASP security standards including Content Security Policy (CSP) and secure headers to strengthen application security.
- **Maintained** 80% test coverage and integrated @tiptap for dynamic content rendering in the CMS.

Investly.id | Bogor, West Java, Indonesia **Frontend & Mobile Developer** | *June 2022 – May 2024*

- **Orchestrated** the end-to-end frontend lifecycle for the Investly web application, translating complex investment education requirements into high-performance user interfaces.
- **Transitioned** from a specialized Mobile Developer (June 2022 – Aug 2022) to Frontend Developer operations, managing the transition of the core product's digital footprint.
- **Participated** in discussions with the Product Manager to align on upcoming features and technical requirements.
- **Collaborated** on code reviews to maintain code quality and share best practices across the team.
- **Managed** the full deployment pipeline, including production web environments and successful submissions to the Apple App Store and Google Play.

WEEKEND Inc. | Jakarta, Indonesia **Mobile Developer** | *September 2021 – August 2022*

- **Developed and Maintained** the AYO SRC and E-Hashtag mobile applications within a high-velocity software agency environment.
- **Collaborated** with Senior Developers and PMs to architect new features that enhanced user engagement and application stability.
- **Eliminated** critical technical debt by resolving complex bugs identified during QA, ensuring a seamless experience for diverse client stakeholders.
- **Helped** manage app store deployment process on occasion, ensuring mobile applications met publication requirements..

Qiblat Indonesia | Bogor, West Java, Indonesia **Frontend Developer** | *September 2019 – May 2022*

- **Developed** and maintained new features for the Yoinves platform and several other web applications.
- **Participated** in team discussions to plan and align on upcoming features before implementation.
- **Collaborated** on code reviews with team members to maintain code quality.
- **Resolved** bugs reported by the team to keep the applications running smoothly.
- Handled deployments to production environments.

Education

Institut Pertanian Bogor (IPB) *Ahli Madya (Associate Degree) in Teknik Komputer* 2016 – 2019
